

Remarks

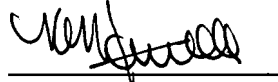

With regard to Examiner Gelin's comments in the Supplemental Notice of Allowability, please note that enumerated item 1 refers to claims 1, 3-10, and 12-17, the status of which group of claims was "pending" at the time of the Examiner's review. This status identifier is absent from the final sentence of this paragraph. Also, enumerated item 2 of the Supplemental Notice of Allowability refers to two telephone interviews between Examiner Gelin and attorney of record Kevin M. Farrell on two dates, 05/18/07 and 07/31/07. The earlier noted interview date is in error, and that telephone interview transpired on 07/18/07.

With regard to the claims as expected to issue, please note that in accordance with the telephone interview of 07/31/07, Applicant wishes to retain the agreed upon language, "transcribed", rather than the Examiner's substitution, "transmitted"; Applicant believes that the Examiner's modification was an unintentional error. Independent claim 1 and independent claim 10 accordingly are currently amended from the language included in the Supplemental Notice of Allowability. Please note also that the claim status identifier "previously presented" is used herein to identify claims previously presented by the Applicant and also those presented by the Examiner in the Supplemental Notice of Allowability.

Summary

In light of the above, issuance of the subject patent application with the claims as shown above is respectfully requested. Any deficiency or overpayment should be charged or credited to Deposit Account No. 500282.

Respectfully submitted,

Kevin M. Farrell
Reg. No. 35,505
